

# Common Medicines: Brand/Medicine Name, Generic Name & Uses

Reference list of commonly encountered medicines. Uses are simplified and not exhaustive. This is for educational reference only and is not a substitute for a doctor or pharmacist.

| No. | Medicine / Common Name | Generic Name         | Common Uses                                                                                       |
|-----|------------------------|----------------------|---------------------------------------------------------------------------------------------------|
| 1   | Paracetamol            | Acetaminophen        | Fever and mild-to-moderate pain                                                                   |
| 2   | Ibuprofen              | Ibuprofen            | Pain, fever, and inflammation                                                                     |
| 3   | Aspirin                | Acetylsalicylic acid | Pain/fever; low-dose use for prevention of certain cardiovascular events when prescribed          |
| 4   | Diclofenac             | Diclofenac           | Pain and inflammation                                                                             |
| 5   | Naproxen               | Naproxen             | Pain and inflammation                                                                             |
| 6   | Cetirizine             | Cetirizine           | Allergic rhinitis, itching, and hives                                                             |
| 7   | Loratadine             | Loratadine           | Allergy symptoms and hives                                                                        |
| 8   | Levocetirizine         | Levocetirizine       | Allergy symptoms and itching                                                                      |
| 9   | Chlorpheniramine       | Chlorpheniramine     | Allergy and cold-related symptoms                                                                 |
| 10  | Omeprazole             | Omeprazole           | Acid reflux, GERD, and peptic-ulcer-related acid reduction                                        |
| 11  | Pantoprazole           | Pantoprazole         | Acid reflux, GERD, and acid-related disorders                                                     |
| 12  | Famotidine             | Famotidine           | Heartburn and acid-related disorders                                                              |
| 13  | Ondansetron            | Ondansetron          | Prevention and treatment of nausea and vomiting                                                   |
| 14  | Domperidone            | Domperidone          | Nausea and vomiting; sometimes used for upper gastrointestinal motility under medical supervision |
| 15  | Metoclopramide         | Metoclopramide       | Nausea/vomiting and certain gastrointestinal motility disorders                                   |
| 16  | Amoxicillin            | Amoxicillin          | Treatment of susceptible bacterial infections                                                     |
| 17  | Azithromycin           | Azithromycin         | Treatment of susceptible bacterial infections                                                     |
| 18  | Doxycycline            | Doxycycline          | Treatment of various bacterial infections; some specific inflammatory/infectious conditions       |
| 19  | Cefixime               | Cefixime             | Treatment of susceptible bacterial infections                                                     |
| 20  | Cephalexin             | Cephalexin           | Treatment of susceptible bacterial infections                                                     |
| 21  | Ciprofloxacin          | Ciprofloxacin        | Treatment of certain bacterial infections                                                         |
| 22  | Metronidazole          | Metronidazole        | Treatment of certain anaerobic bacterial and protozoal infections                                 |
| 23  | Fluconazole            | Fluconazole          | Treatment of certain fungal infections                                                            |
| 24  | Acyclovir              | Acyclovir            | Treatment of certain herpesvirus infections                                                       |
| 25  | Albendazole            | Albendazole          | Treatment of certain intestinal worm infections                                                   |
| 26  | Metformin              | Metformin            | Type 2 diabetes and insulin resistance                                                            |
| 27  | Glimepiride            | Glimepiride          | Type 2 diabetes                                                                                   |
| 28  | Sitagliptin            | Sitagliptin          | Type 2 diabetes                                                                                   |
| 29  | Empagliflozin          | Empagliflozin        | Type 2 diabetes; also used in certain heart and kidney conditions                                 |
| 30  | Insulin                | Insulin              | Blood-glucose control in diabetes                                                                 |

| No. | Medicine / Common Name | Generic Name           | Common Uses                                                                 |
|-----|------------------------|------------------------|-----------------------------------------------------------------------------|
| 31  | Amlodipine             | Amlodipine             | High blood pressure and certain types of angina                             |
| 32  | Losartan               | Losartan               | High blood pressure and certain kidney/cardiovascular conditions            |
| 33  | Telmisartan            | Telmisartan            | High blood pressure and cardiovascular risk reduction in selected patients  |
| 34  | Enalapril              | Enalapril              | High blood pressure and heart failure                                       |
| 35  | Atenolol               | Atenolol               | High blood pressure and certain heart conditions                            |
| 36  | Metoprolol             | Metoprolol             | High blood pressure, angina, and certain heart conditions                   |
| 37  | Furosemide             | Furosemide             | Fluid retention/edema and certain heart or kidney-related conditions        |
| 38  | Hydrochlorothiazide    | Hydrochlorothiazide    | High blood pressure and fluid retention                                     |
| 39  | Atorvastatin           | Atorvastatin           | High cholesterol and cardiovascular risk reduction                          |
| 40  | Rosuvastatin           | Rosuvastatin           | High cholesterol and cardiovascular risk reduction                          |
| 41  | Clopidogrel            | Clopidogrel            | Prevention of blood clots in selected cardiovascular conditions             |
| 42  | Warfarin               | Warfarin               | Prevention and treatment of certain blood clots                             |
| 43  | Apixaban               | Apixaban               | Prevention and treatment of certain blood clots                             |
| 44  | Levothyroxine          | Levothyroxine          | Replacement treatment for an underactive thyroid                            |
| 45  | Prednisolone           | Prednisolone           | Inflammatory and immune-mediated conditions                                 |
| 46  | Hydrocortisone         | Hydrocortisone         | Corticosteroid replacement and treatment of certain inflammatory conditions |
| 47  | Salbutamol             | Salbutamol (Albuterol) | Relief of bronchospasm in asthma and other obstructive airway conditions    |
| 48  | Budesonide             | Budesonide             | Control of inflammation in asthma and certain other inflammatory conditions |
| 49  | Montelukast            | Montelukast            | Asthma maintenance and allergic rhinitis in selected patients               |
| 50  | Sertraline             | Sertraline             | Depression and certain anxiety-related disorders                            |
| 51  | Escitalopram           | Escitalopram           | Depression and certain anxiety-related disorders                            |
| 52  | Clonazepam             | Clonazepam             | Certain seizure disorders and panic disorder; prescription use              |

**Important:** Antibiotics, anticoagulants, corticosteroids, insulin, and medicines affecting the nervous system should be used only according to appropriate medical advice. Dosage, duration, contraindications, interactions, and patient-specific indications are not included in this list.

Generic names may vary slightly by country or formulation. Always verify the medicine and strength on the package or with a qualified healthcare professional.
